MLA Format

We are using the MLA format in the middle school. Students will be expected to use this format throughout their middle school career. Anytime their teacher assigns a formal paper they may tell them the heading must be in MLA format. The heading is your name, teacher's name, the class, and the date due(all single spaced). Proceed to double space..then center your title. Double space again, indent your paragraph and begin typing. Your font must be 12 point Times New Roman. Finally, in the right hand corner you have your last name followed by the page number. This continues with all other pages.
