

May 9th, 2008

Happy Mother's Day! Thanks for spending some time with us today to honor our special moms. In Language Arts, we read *Trapped by the Ice*, a story about a voyage to Antarctica. We learned how to use a text organization chart, about homophones, timelines, possessive pronouns, and spelling words with the VCCV pattern. Next week, we will be wrapping up Theme 5 on Voyagers. We will review skills we learned in this theme and will have a theme test on Friday. Our spelling words next week will all be review words. In Math, we will finish learning about more advanced multiplication and division and will test on Thursday of next week. Your child will need to know how to do the traditional method, partial products algorithm and the lattice method of multiplication for the test. Please keep studying those facts! We will have another mixed fact quiz on Wednesday. We will begin our last Science unit on Water next week.

Don't Forget

- Fall Sports Registration: Registration for the fall sports season is on Mr. Solsten's web page. Forms are due by May 23, 2008.
